# *Public Law*

---

Our experience in advising public and private organizations on Public Law matters allows us to offer global insight on the effects of public policies in different sectors of the economy.

We always aim to provide a rigorous approach to the legal issues in line with client expectations: the licencing of an economic activity, the preparation of public procurement procedures, the award or

negotiation of a public contract, the challenging of an administrative act.

We believe that the relationship with public organizations is not limited to a bureaucratic activity, with strategic, efficiency and public responsibility being essential aspects when dealing with contracts, structuring procedures or defending the interests of public or private contractors.
